In Australian cosmetic medicine, most of the words people search with are banned from the page. Type four letters of one and the search answers with the legal term instead.

A directory of verified practitioners, built with the owner, a branding agency, the legal team and one other developer. Practitioners apply with their documents and stay invisible until the owner approves them by hand: only then do the badge and the public profile go live. Search by name, treatment, keyword, distance or map, across 50+ treatments.
